**- Νοέμβριος 2006 -**

## *250 BC - Erasistratus - the brain and the vital spirit.*

Erasistratus (300-260 BC) was an anatomist who worked one century after Aristotle. He found three tubular structures going to every organ of the body: an artery, a vein, and a nerve. He expanded Herophilus's theory of motor and sensory nerves by adding the thesis that all nerves are connected to and controlled by the brain. Erasistratus saw the brain as a mechanism for distilling the pneuma (the vital spirit), which he thought was flowing from the heart up to the brain and then down to the organs. # **PARALLEL LIVES: ANCIENT ISLAND SOCIETIES IN CRETE AND CYPRUS, 30 NOVEMBER - 2 DECEMBER 2006, UNIVERSITY OF CYPRUS, NICOSIA**

### *Invitation to attend*

### **PARALLEL LIVES**

### **ANCIENT ISLAND SOCIETIES IN CRETE AND CYPRUS**

An International Conference

Organised by

The University of Cyprus, the University of Crete and the British School at Athens.

The Archaeological Research Unit of the University of Cyprus invites colleagues, students and all interested members of the general public to attend the conference

### *Parallel Lives: Ancient Island Societies in Crete and Cyprus*

**Dates:** Thursday, 30 November - Saturday, 2 December 2006

**Venue:** University of Cyprus Conference Hall,  
75 Kallipoleos Avenue, Nicosia

The Conference will examine, compare and attempt to interpret diachronically the environments, cultures, developments, continuities and changes of the societies of the two large islands of the East Mediterranean in the Bronze Age and Iron Age, down to the time of their polities' loss of independence to the Ptolemies or the Romans. The conference is organised in "paired" sessions around key diachronic themes. Programme and abstracts have been posted at <http://noticeboard.ucy.ac.cy/ema/>. For further information please email to the secretariat: [marias@ucy.ac.cy](mailto:marias@ucy.ac.cy). There are no registration fees.

### *Scientific Committee:*

Gerald Cadogan, Chair (former BSA Chairman), Maria Iacovou (Associate Professor, University of Cyprus), Katerina Kopaka (Associate Professor, University of Crete) and James Whitley (BSA Director).

### *Organising Committee, Archaeological Research Unit, University of Cyprus:*

Demetrios Michaelides, Director of the Archaeological Research Unit (Professor), Maria Iacovou (Associate Professor), Vasiliki Kassianidou (Assistant Professor), Ourania Kouka (Lecturer) and Giorgos Papasavvas (Assistant Professor).

## **NOVEMBER PROGRAM IN** **ARCHAEOLOGICAL METAL STUDY** **AND PRESERVATION**

Please circulate these links to program and registration info on our fast-approaching mid-November program of sessions and short courses on current electrochemical technology and methods for study and preservation of archaeological metal artifacts.

All speakers and instructors are top international experts in their fields!

This is a rare event for electrochemistry in archaeology, not likely to soon be repeated in North America.

### **LINKS:**

[www.NYCF.org/eas.html](http://www.NYCF.org/eas.html)

Scroll down for 2006 Program electrochemistry listings all on one page; further down are listings of programs since 1994.

General, Preliminary Program, and registration info on EAS, the international meeting that hosts and co-supports our annual program on sciences in cultural heritage conservation.

Download pdf Program at: [http://www.eas.org/pdf/EAS\\_Prelim06\\_6.pdf](http://www.eas.org/pdf/EAS_Prelim06_6.pdf)

Register online at:

[https://www2.compusystems.com/servlet/AttendeeRegLoginServlet?evt\\_uid=245](https://www2.compusystems.com/servlet/AttendeeRegLoginServlet?evt_uid=245)

Short course E06-17: "Introduction to parameters for monitoring, storage and treatment," (11/12) Instructor: Dr Christian Degrieny, Chateau de Germolles, Mellecey, FR, Coordinator of the Metal Working Group of the International Council on Museums' Conservation Committee

Short course E06-11: "Introduction to portable electrochemical devices," (11/15 and 11/16) Instructors : Virginia Costa, Institut National du Patrimoine (INP), St. Denis, FR; Hercilio Gomes de Melo, Escola Politecnica da Universidade de Sao Paulo; Lecturers: Paola Letardi, CNR-ISMAR-Sezione di Genova; Ian MacLeod, Western Australian Museum; Blanca Rosales, CIDEPINT, Argentina

Although we heavily subsidize them, the short courses also depend on participants' very reasonable additional registration fees. We need to reach short course registration minimums before next Monday, the 23rd of November. Your registration could make the difference.

Interested? Want to learn current technology and methods? REGISTER NOW

See you there!

**PER I CENTO ANNI DELLO SCAVO DI**  
**PRINIÀS 1906 – 2006, CONVEGNO DI**  
**STUDI IDENTITÀ CULTURALE,**  
**ETNICITÀ, PROCESSI DI**  
**TRASFORMAZIONE A CRETA FRA**  
**DARK AGE E ARCAISMO, ATENE, 9 - 12**  
**NOVEMBRE 2006, SCUOLA**  
**ARCHEOLOGICA ITALIANA - AULA**  
**DORO LEVI**

**PROGRAMMA**

Giovedì 9 novembre, ore 17

Saluto delle Autorità

Apertura dei lavori

Relazione introduttiva:

EMANUELE GRECO

Priniàs nel quadro degli studi sulla urbanistica protoarcaica in Grecia

Venerdì 10 novembre, ore 9 – 13

Priniàs

KATIA PERNA

Priniàs all'alba della Dark Age: l'evidenza ceramica

ROSSELLA GIGLI

Brindare con gli antenati. Un deposito di fondazione dall'area a Sud del tempio B di Priniàs

GIOVANNI RIZZA

Identità, etnicità, processi di trasformazione a Priniàs

Coffee break

DARIO PALERMO

Edifici pubblici e residenze private sulla Patela di Priniàs

ANTONELLA PAUTASSO

Immagini e identità: osservazioni sulla scultura di Priniàs

Discussione

Venerdì 10 novembre, ore 16 – 20

Temi generali e iconografia

HARTMUT MATTHÄUS

The Sacred Cave of Zeus on Mount Ida. The most Important Pan-Cretan Sanctuary.

Evidence of Metalwork

ANTONIS KOTSONAS

Foreign Identity and Ceramic Production in Iron Age Crete

YVONNE KAISER

Octopuses and Identity in Geometric Crete

Coffee break

NOTA KOUROU

Following the Sphinx: Near Eastern Imports and Their Cultural Implications in Early Iron Age Crete

VINCENZO LA ROSA

Un "ippodamos" a Creta nel TM IIIC

ELEONORA PAPPALARDO

Fra Cnosso e l'Anatro Ideo. Iconografie e rapporti con l'Oriente

FABIO CARUSO

"Perchance to dream". Una lettura della coppa a figure incise C 2396 di Kommos

Discussione

Sabato 11 novembre, ore 9 – 13

Creta e la Sicilia

ROBERTO SAMMARTANO

I Cretesi in Sicilia: la proiezione culturale

DARIO PALERMO

I Cretesi in Sicilia: identità e processi di trasformazione

Coffee break

GIACOMO BIONDI

Ricostruire un legame perduto. Elementi di tradizione cretese nella cultura funeraria siceliota di età arcaica

VINCENZO LA ROSA

Élites sicane e antroponimi micenei: identità culturale o etnicità cretese fuori di Creta?

Discussione

Sabato 11 novembre, ore 16 – 20

Città, santuari e necropoli

MARIA ENGLEZOU

Keramiki geometrikis, proimis anatolizousas periodo apo tin periokhi Ligortynos Monofatsiou Irakleiou

NUNZIO ALLEGRO - EMANUELA SANTANIELLO

Gortina. L'abitato di Prophitis Ilias e la storia più antica della città

MARGARET S. MOOK

The Greek Kitchen Revisited: Public and Private Cooking in the Late Archaic City. Evidence from Azoria

Coffee break

OLIVER PILZ - MICHAEL KRUMME

Preliminary Report on the Re-study of the Material from the Votive Deposit of Kato Plai on the Anavlochos Ridge

MASSIMO CULTRARO

Il rituale funerario dell'incinerazione a Creta tra tarda età del Bronzo e prima età del Ferro

NICOLA CUCUZZA

Tombe e costumi funerari nella Festòs della Dark Age: qualche osservazione

Discussione

Domenica 12 novembre, ore 9 – 13

ATHANASIA KANTA

Tylisos towards the End of the Bronze Age and during the Dark Ages. Elements of History for Central Crete from the Archaeological Evidence

NIKOLAOS STAMPOLIDIS

Eleutherna and the Idean Cave

Discussione

Coffee break

Conclusioni: A. CHANIOTIS

## FITCH-WIENER LABS SEMINAR SERIES

on “science-based archaeology”

The second seminar will be held on

**TUESDAY, 7<sup>TH</sup> NOVEMBER, 5:30 P.M.**

**Dr. Evi Margariti**

(University of Cambridge)

will introduce the topic:

***“Drinking Passions: an Archaeobotanical  
Perspective on Wine Production and Consumption  
in Classical Greece”.***

*The seminar will take place at the Fitch Laboratory of the British School at Athens. Entrance from Ioannou Patera 53 (BSA) or Souedias 54 (ASCSA). Tel: 210-7217482*

# **INTERNATIONAL CONFERENCE,** **ANCIENT GREECE AND ANCIENT IRAN** **– CROSS CULTURAL ENCOUNTERS**

**National Hellenic Research Foundation, L. Zervas  
Amphitheatre, Vas. Konstantinou 48, Athens**

UNDER THE AEGIS OF THE GREEK NATIONAL COMMISSION FOR UNESCO  
The National Hellenic Research Foundation and the Iranian Cultural Centre are organizing the First International Conference on *Ancient Greece and Ancient Iran: Cross-Cultural Encounters*, Athens, 11-14 November 2006.

The aim of the Conference is to clarify ambiguities about the historical contacts between ancient Greeks and Iranians by documenting the extensive dialogue between the Greek and Iranian peoples in the domains of statecraft, art/architecture, religion/philosophy and literature.

---

**HELIKE IV:**  
**THE FOURTH INTERNATIONAL**  
**CONFERENCE ON ANCIENT HELIKE**  
**AND AIGIALEIA**

**Title:**  
**THE EARLY HELLADIC PELOPONNESOS**

Aigion, 1-3 September 2007

FIRST CIRCULAR - October 2006

***CALL FOR PAPERS***

Dear Colleagues,

I have the pleasure to announce the Fourth International Conference in our series on Ancient Helike and Aigialeia, this time dedicated to the recently discovered Early Helladic settlement in Helike and to the entire Early Helladic Peloponnesos. The new EH site discovered in Helike, which preserves its rich contents intact, adds the northwestern region to the known map of the EH Peloponnesos and offers new evidence on important issues regarding the Early Bronze Age in Greece. The new finds excavated so far from a small part of the EH settlement at Helike include a network of paved streets and monumental buildings (one of the “corridor house” type), rare types of vessels (*depas amphikypellon* with incised symbol), and objects in gold and silver. Due to the conditions of its burial under thick lagoonal deposits, the newly discovered site is preserved intact – as it was exactly at the time of its destruction and abandonment — thus offering a unique possibility of excavating and studying a “pure” EH site, one without any of the subsequent interventions that usually alter the form of such sites.

The specific aims of the Conference are: (a) to present the finds from the new EH site in Helike, and (b) to present the most recent evidence from other EH sites in Peloponnesos. The overall aim of the Conference is to discuss important issues of the EH culture, such as its political, economic and social organization, interregional and external contacts, sites distribution, natural environment, natural disasters and their impact on the life of the EH sites.

I would like to invite you to participate in the Conference by presenting one or more papers of your choice on the basis of the following sets of topics:

Architecture and building techniques.  
“Corridor houses”. Their architecture and function.  
Use of space and equipment of houses.  
Town planning and early urbanization.

Pottery: Typology, technology, decoration, use.  
Craft specializations and metallurgy.

Food and faunal remains. Production and food economy.  
Interregional and external relations. Trade.  
Everyday life in the settlements.

Natural environment.  
Distribution of settlements.  
Natural hazards and their impact on EH habitation sites of Peloponnesos.

Identity of the Kastri phase and its distribution in Peloponnesos.

## **Absolute dating and chronology of the EH period**

### **IMPORTANT DEADLINES:**

Submission of title, **November 30 2006**

Submission of abstract, **January 15 2007**

### **CONTACT**

The titles and abstracts should be sent either electronically to: [eliki@otenet.gr](mailto:eliki@otenet.gr) or by post to: 58 Solomou Street, Athens 10682 (Dr. Dora Katsonopoulou). For any other information, please call or send a fax at ++30210 38 45658.

### **REGISTRATION FEES**

For participants: 150 euro by March 31 2007, 180 euro later than this date.

For students & observers: 50 euro by March 31 2007, 70 euro later than this date.

A second circular will follow after submission of titles and abstracts, including the preliminary program of the Conference and information regarding your stay (hotel accommodation) and other Conference events. All meals during your stay will be offered by the organizers.

With best regards,  
For the Organizing Committee

Dora Katsonopoulou  
President

## AIA NOVEMBER LECTURE

Dear all,

It is a pleasure to announce our fourth, and last, lecture for 2006.

Speaker: Prof. John K. Papadopoulos (University of California, Los Angeles)

Topic: *Tumuli and the Archaeology of Death: Excavations at the Prehistoric Burial Tumulus of Lofkënd in Albania*

Date: Tuesday, November 7, 7.30pm

Venue: The Canadian Institute in Greece, Dionysiou Aiginitou 7, Ilisia (nearest Metro station: *Megaro Mousikis*)

On the behalf of the Committee,  
Ioannis Georganas

\*\*\*\*\*

Ioannis Georganas, PhD  
President, Athens-Greece Society  
Archaeological Institute of America

c/o The Canadian Institute in Greece  
Dionysiou Aiginitou 7,  
GR 115 28 Athens, Greece

**TREE-RINGS, KINGS, AND OLD WORLD**  
**ARCHAEOLOGY & ENVIRONMENT:**  
**CORNELL DENDROCHRONOLOGY-**  
**ARCHAEOLOGY CONFERENCE IN HONOR**  
**OF PETER IAN KUNIHOLM, 3-5 NOVEMBER**  
**2006, CORNELL UNIVERSITY**

An important conference in honor of a very important scholar.

Friday, 3 November 2006

12.00 onwards - open lab

6:00 p.m. Colin Renfrew, Keynote Address Reception

Saturday, 4 November 2006

Start 8:30 a.m.

Talks:

Mehmet Özdođan, The “Kuniholm Impact” on the chronology of the Neolithic period and its consequences

Andreas Müller-Karpe, The rise and fall of the Hittite Empire in the light of dendroarchaeological research

Mary Voigt, The Gordion archaeological sequence and how it came to be the way it is

Geoffrey Summers, The end of chronology: New directions in the archaeology of the Central Anatolian Iron Age

Harvey Weiss, High resolution Akkadian period radiocarbon dates from Tell Leilan resolve the Mesopotamian historical chronology problem?

Ezra Marcus, Throwing off the yoke of Egypt: Towards an independent absolute chronology of the Levant

James Weinstein, Comments and perspectives on Levantine chronology

Christos Doumas, Aegean absolute chronology: where did it go wrong?

Ourania Kouka, Third Millennium BC Aegean Chronology: Old and new data from the perspective of the Third Millennium AD

Sofia Voutsaki, Middle Helladic chronology and society

Jeremy Rutter, How about the pace of change for a change of pace?

Elizabeth French & Kim Shelton, Archaeologists and scientists: Bridging the credibility gap

Cemal Pulak, The Imperial Ottoman Barge (Kadırga): Difficulties in dating the world's oldest historic ship

Maryanne Newton, Dendrochronology as a tool for absolute dating across the eastern Mediterranean

Kenan Ünlü, Neutron activation analysis of dendrochronologically-dated trees

Danielle Schwarz & Kenan Ünlü, Dendrochemistry of *Pinus sylvestris* trees from a Turkish forest: Identifying the effects of Pinatubo

Dinner

Sunday 5 November 2006

Start 8:30 a.m.

Posters & Coffee

(presenters include: Sevil Gülçur, Aleksandar Durman, A. Gaspari & T. Levanic, Tomasz Wazny, Christine Hallman & Katherine Hirschboeck, Otto Cichocki, Albert Nijboer, Carin Ashjian, Stephen Nash, Ken Wardle & Maryanne Newton, Christopher Roosevelt & Christina Luke, Maria Ivana Pezzo, André Billamboz, Rachel King)

Talks:

Bernd Kromer, Aegean dendrochronology and radiocarbon–25 years of Heidelberg-Cornell collaboration

Sturt Manning, Archaeology and science and the chronology of the 2nd millennium BC Aegean and East Mediterranean

Walter Kutschera, Radiocarbon dating at Tell el-Daba and the puzzle of the East Mediterranean Late Bronze Age chronology

Carol Griggs, Evidence for low-frequency variation in climate from North Aegean oaks in the 2nd millennium AD

Fritz Schweingruber, Historical consideration of dendrochronology to the present

Jeffrey Dean, One hundred years of dendrochronology: dating, human behavior, and past climatic variability

Charlotte Pearson, Tree rings and volcanic eruptions: Prospects for a dendrochemical resolution for the absolute dating of past volcanism

Malcolm Hughes, Distant fire: tree rings, ice cores, and volcanoes

Paolo Cherubini, Old stories and new approaches to understand the impact of volcanic explosions on tree growth and physiology in the Mediterranean

Ramzi Touchan & Malcolm Hughes, An overview of dendroclimatology in the Near East and eastern Mediterranean region

James Muhly, Perspective: archaeology, history and chronology from Penn to the present and beyond

John Brinkman, Perspectives on the future of Mesopotamian chronology of the historical period

Mike Baillie, Tree-rings–The Alternative Universe of absolute time

Malcolm Wiener, Cold fusion: the uneasy alliance of history and science

Hunter Rawlings III, A Classical and Institutional perspective

**35<sup>TH</sup> ANNUAL CONFERENCE OF  
COMPUTER APPLICATIONS AND  
QUANTITATIVE METHODS IN  
ARCHAEOLOGY (CAA) TO BE HELD IN  
BERLIN, 2-5 APRIL 2007**

Dear colleagues,

The Conference Organizing Committee for CAA 2007 invites you to participate in the **35<sup>th</sup> Annual Conference of Computer Applications and Quantitative Methods in Archaeology (CAA)** to be held in **Berlin, 2-5 April 2007** under the auspices of the Minister of Foreign Affairs of the Federal Republic of Germany, Dr. Frank-Walter Steinmeier. The conference is organized by the German Archaeological Institute (DAI), the Centre of the Ancient World (IZAW), Freie Universität Berlin, the Collection of Classical Antiquities Berlin (Pergamonmuseum), Staatliche Museen Preußischer Kulturbesitz, and the CAA Germany.

The conference brings together students, researchers, heritage managers and other experts to present, examine and discuss current theory and application of quantitative methods and computer science in Archaeology. These include **methods and applications of 3D reconstructions, geographic information systems, web data bases, photogrammetry, statistics, and many other subjects**. With its interdisciplinary approach the conference will discover different layers of perception, and this is why "**layers of perception**" is the CAA 2007 conference theme.

You can participate in the conference by presenting a paper or poster. In addition, you may organize or take part in a discussion panel or workshop. If you intend to present a paper or poster or to organize a discussion panel or workshop, please read the call for papers. Or, simply attend the conference, with its open and cordial atmosphere, to learn more about new developments in computer applications and quantitative methods, and to meet and talk with international colleagues.

**Deadline for the submission of session, round table, and workshop proposals for the CAA 2007 is October 31<sup>st</sup>, 2006**

Deadline for abstract submission, grant application and early registration fees is **December 31<sup>st</sup>, 2006**

**Online registration and abstract submission is now available on the homepage ([www.caa2007.de](http://www.caa2007.de)).**

Please feel free to distribute widely this conference announcement and the attached call for papers to your colleagues and to any mailing lists you belong to.

Thank you for your attention,

Hauke Ziemssen

**TECHNOLOGICAL CHOICES: FOR THE**  
**SECOND ANNUAL UNIVERSITY OF**  
**NOTTINGHAM POSTGRADUATE**  
**ARCHAEOLOGY CONFERENCE,**  
**UNIVERSITY OF NOTTINGHAM, APRIL, 2007**

We are seeking contributions  
Conservatism and Change

Are you a postgraduate researcher in Archaeological Materials?

Would you like a chance to discuss your work with other postgraduates at an informal conference?

This conference will explore materials study in archaeology. Material culture plays an active role in the construction and reproduction of social relations and cultural values. In recent years the co-operation of materials scientists and archaeologists has led to many new developments in this field. The concept of ‘technological choices’ has opened up a wider consideration of both the physical and cultural contexts of a particular artefact and the social and environmental factors that shape technological change.

We invite fellow postgraduates to join us and present papers on themes such as the evolution of technological systems, the influence of social, economic and ideological factors on technological choices and the use of scientific analysis in the reconstruction of these choices. Contributions on any other related themes would also be welcome.

Please send abstracts of c.200 words by 15<sup>th</sup> of December to:  
[techoi2007@hotmail.co.uk](mailto:techoi2007@hotmail.co.uk)

**DR GRZEGORZ ADAMIEC LECTURE,**  
**INSTITUTE OF MATERIALS SCIENCE,**  
**N.C.S.R. DEMOKRITOS**

We cordially invite you to the Lecture Hall of the  
*Institute of Materials Science, N.C.S.R. Demokritos*

for the presentation of

*Dr Grzegorz Adamiec*

*entitled*

**Numerical modelling of optically stimulated luminescence in quartz and  
its applications.**

G. Adamiec is member of the Department of Radioisotopes, Institute of Physics at the Silesian University of Technology, Poland, where the GADAM Centre (Gliwice Absolute Dating Methods Centre) is hosted. Since 2006 he is managing the Luminescence Dating Laboratory.

GADAM Centre mainly consists of three large research groups: the Radiocarbon Laboratory, the Luminescence Dating Laboratory and the Mass Spectrometry Laboratory. During the lecture, a summary of the research activities of the GADAM Centre will be also presented.

The seminar will be held on

**THURSDAY, 30<sup>TH</sup> NOVEMBER, 14:00**

---

**ΘΕΣΕΙΣ ΕΡΓΑΣΙΑΣ/ΥΠΟΤΡΟΦΙΕΣ –**  
**JOB VACANCIES/FELLOWSHIPS**

**SUERC JOB POSTING**

Hello all,

The SUERC is seeking a scientist with compound-specific C14 interests. You can view the job description and instructions for applying at this URL:

[http://www.gla.ac.uk/services/humanresources/recruit/27oct\\_12525.htm](http://www.gla.ac.uk/services/humanresources/recruit/27oct_12525.htm)

Best,

Mark

## **ANSTO AMS POSITION, PHYSICIST / INSTRUMENT SPECIALIST**

*Salary range \$49K - \$64K (plus super)*

ANSTO's Institute for Environmental Research is a multidisciplinary research Institute of approximately 100 people possessing a broad range of scientific expertise. The Institute's goal is to carry out balanced strategic and applied research and development, with projects aimed at applications of nuclear or isotopic science in the hydro- and geosphere and focussed on terrestrial, marine and freshwater ecosystems, atmosphere and climate, paleoclimate and water resources.

We seek a highly motivated experimental scientist to work as a specialist in Accelerator Mass Spectrometry. The successful candidate will work in a team that performs research and development involving the measurement of long-lived radioisotopes, including radiocarbon dating, using a 10 MV Tandem and a 2 MV Tandatron accelerator. This research involves interaction with other ANSTO Institutes, Australian universities, national and international laboratories.

Following appropriate training, you will:

- Set up and perform measurements on accelerator systems;
- Assist research scientists in the design and development of new instrumentation;
- Maintain existing systems in good working order;
- Become familiar with the basic scientific aspects of accelerator mass spectrometry and the measurement of long-lived radioisotopes.

You will have successfully completed a degree in Physics, Applied Science or related discipline, and have an excellent academic record. Experience in operation, design and/or development of complex laboratory equipment is essential. An attractive salary package will be offered depending on qualifications and experience. To be eligible for engagement, applicants will require a medical and security assessment. Australian citizenship is preferred.

For further details please contact Dr David Fink on (02) 9717-3048, fax (02) 9717 3257 or e-mail [David.Fink@ansto.gov.au](mailto:David.Fink@ansto.gov.au)

Further information, selection criteria and application details are available online at [www.ansto.gov.au](http://www.ansto.gov.au) or by contacting Ms Deanne Wood on (02) 9717 3993 or e-mail [Deanne.Wood@ansto.gov.au](mailto:Deanne.Wood@ansto.gov.au)

Your application **must** address the selection criteria, include a CV and the details of three professional referees, and should be forwarded by email or mail to Ms Deanne Wood, Institute for Environmental Research, ANSTO, PMB 1, Menai NSW 2234.

**Applications close: 10 November 2006**

## **FELLOWSHIPS AT RESEARCH CENTER FOR ANATOLIAN CIVILIZATIONS**

Dear all,

this is the link to Residential Fellowships at Research Center for Anatolian Civilizations  
Koç University, Istanbul, Turkey for the Academic Year 2007-2008

<http://rcac.ku.edu.tr/fellowship.htm>

best wishes

## **UNIVERSITY OF CINCINNATI,** **DEPARTMENT OF CLASSICS, TYTUS** **SUMMER RESIDENCY PROGRAM**

The University of Cincinnati Classics Department is pleased to announce the Summer Residency Program. Summer Residents, in the fields of philology, history and archaeology will come to Cincinnati for a minimum of one month and a maximum of three during the summer (June 15 - September 15). Apart from residence in Cincinnati during term, the only obligation of Summer Fellows is to pursue their own research. They will receive free university housing. They will also receive office space and enjoy the use of the University of Cincinnati and Hebrew Union College Libraries.

The University of Cincinnati Burnam Classics Library (<http://www.libraries.uc.edu/libraries/classics/index.html>) is one of the world's premier collections in the field of Classical Studies. Comprising 210,000 volumes and other research materials, the library covers all aspects of the Classics: the languages and literatures, history, civilization, art, and archaeology. Of special value for scholars is both the richness of the collection and its accessibility -- almost any avenue of research in the classics can be pursued deeply and broadly under a single roof. The unusually comprehensive core collection, which is maintained by three professional classicist librarians, is augmented by several special collections such as 15,000 nineteenth century German *Programmschriften*, extensive holdings in Palaeography, Byzantine and Modern Greek Studies. At neighboring Hebrew Union College, the Klau Library (<http://library.cn.huc.edu/>), with holdings in excess of 445,000 volumes and other research materials, is rich in Judaica and Near Eastern Studies.

Application Deadline: February 15. Applicants must have the Ph.D. in hand at the time of application.

For application forms please write:

Director, Summer Residency Program  
Department of Classics  
University of Cincinnati  
Cincinnati, OH 45221-0226

There is an online application for the Summer Residency Program at <http://classics.uc.edu/resources/tytus2.html>.

## **ΑΝΑΚΟΙΝΩΣΕΙΣ - ANNOUNCEMENTS**

### **EARLY BUILDING WITH PAINTINGS**

### **FOUND IN SYRIA**

Dear all,

A building from c. 8800 BC has been found by French archaeologists in Syria:

Archaeologists said they have discovered an 11-millennium-old building on the banks of the Euphrates River in northern Syria.

"A remarkable discovery has just been uncovered of a large circular building dating back to 8,800 BC near (the locality of) Ja'de," the head of the French archaeological team that made the find told AFP.

The building, much larger than normal houses, "had a collective use, probably for all of the village or a group," Eric Coqueugniot said.

"A part of this community building takes the shape of the head of a bull and retains painted decorations, the oldest known in the Middle East," he said.

"The multi-coloured geometrical paintings" that decorate the building would be displayed at the museum of Aleppo, in northern Syria, he added.

(Coqueugniot heads the team of the National Centre for Scientific Research (CNRS), France's largest scientific establishment, which has led the excavation work at the site for the past 15 years.)

Best wishes,  
Bjarte Kaldhol

## *INTERNET SITES*

# **OXCAL4 RELEASED**

This is a completely new version of OxCal. The new version differs from version 3 in a number of ways:

It is web-based and so can be used online without installation (assuming you have a suitable browser) . Standalone versions are available for PC and Mac platforms . The program incorporates many new modelling tools - including methods for age-depth modelling . Post-bomb calibration is now possible . All graphics are in the SVG (scalable vector graphics) format

For further information and access to the program see the OxCal website:

<http://c14.arch.ox.ac.uk/oxcal.html>

## **ΝΕΕΣ ΕΚΔΟΣΕΙΣ – NEW PUBLICATIONS**

# **NEW AEGEAN BOOK, ARCHAEOLOGY AND EUROPEAN MODERNITY: PRODUCING AND CONSUMING THE 'MINOANS', EDITED BY Y HAMILAKIS AND N MOMIGLIANO**

This unique collection contributes to current debates on the relationship between archaeology and European modernity by focusing on the specific case study of Minoan Crete, which has often been hailed as the cradle of European civilisation. It represents the first multidisciplinary effort to understand critically the disciplinary history and reception of the Minoan past, by bringing together the work of archaeologists, historians, anthropologists, art historians, and literary scholars. The contributions deal with a variety of issues concerning the 'production' and 'consumption' of the Minoan past, especially its use in the construction of European, Mediterranean, Greek, and Cretan identities. They cover an exceptionally wide array of topics, ranging from the historical and intellectual environment in which the rediscovery of Minoan Crete took place to the role of the Minoan past in Freudian psychoanalysis, and from the reception of the Minoans in modern European artistic movements and literary works to tourism, heritage management, and pedagogy. The volume will be of interest to archaeologists, historians, anthropologists, and art historians interested in the politics of the past, the archaeology and anthropology of identity, the critical history of archaeology, colonialism, nationalism, and European modernity.

(Creta Antica 7, Aldo Ausilio, 2006); Pp: 277.

Price GB £85.00; (orders: [info@ausilioeditore.com](mailto:info@ausilioeditore.com); also: [www.oxbowbooks.com](http://www.oxbowbooks.com))

### **CONTENTS**

#### **I. INTRODUCTION**

1. Archaeology and European Modernity: Stories from the Borders Yannis Hamilakis and Nicoletta Momigliano

#### **II. THE PRESENT IN THE PAST: PRODUCING THE 'MINOANS'**

## **EΙΔΗΣΕΙΣ - NEWS RELEASE**

# **GOATS KEY TO SPREAD OF FARMING, GENE STUDY SUGGESTS, JAMES OWEN, FOR NATIONAL GEOGRAPHIC NEWS, OCTOBER 10, 2006**

Goats accompanied the earliest farmers into Europe some 7,500 years ago, helping to revolutionize Stone Age society, a new study suggests.

The trailblazing farm animals were hardy and highly mobile traveling companions to ancient pioneers from the Middle East who introduced agriculture to Europe and elsewhere, researchers say.

The onset of farming ushered in the so-called Neolithic Revolution, when settled communities gradually replaced nomadic tribes and their hunter-gatherer lifestyles between 8000 and 6000 B.C.

A team of archaeologists and biologists has traced the origins of domesticated goats in Western Europe to the Middle East at the beginnings of the Neolithic period.

The study is based on DNA analysis of goat bones from a Stone Age cave in France and suggests the animals spread across Europe quickly after their introduction.

The team says its findings, reported this week in the *Proceedings of the National Academy of Sciences*, indicate that goats may have played a key role in the rise and spread of farming worldwide.

### **Genetic Mixing**

The new research follows up on a 2001 study by the same team that found domesticated goats today are much more mixed genetically than other livestock.

By tracing the animals' mitochondrial DNA, which is passed down in cells through generations from mother to offspring, scientists showed that goats differ much less genetically between continents than cattle, sheep, or pigs.

This suggested that goats were transported much more extensively in the past, allowing the genetic material from different populations to intermingle.

The findings were very surprising, according to team member Pierre Taberlet from the Laboratoire d'Ecologie Alpine at Joseph Fourier University in Grenoble, France.

"For example, cattle from North Africa are different from cattle from Europe, but for goats everything is mixed—almost the same level of [genetic] mixing as in humans," he said.

The 2001 study also traced the main origins of domesticated goats to the Near and Middle East regions.

The goal of the latest research was to find out when the genetic mixing of farm goats began—in recent centuries, during the period of the Mongolian Empire, during the Roman Empire, or much earlier?

DNA analysis of 7,000-year-old goat bones from caves in Baume d'Oullen in southwestern France revealed high genetic diversity and two goat lineages stemming from the Near East.

The researchers say that this indicates genetic mixing in goats occurred with the first waves of Neolithic farmers in Europe around 7,500 years ago.

Goats would have been ideally suited companions for frontier farmers in Stone Age Europe, the researchers say, being hardy animals that can survive on minimal food, cope with extremes of temperature, and travel long distances.

"They follow you like a dog," Taberlet said. "It was easier to travel with goats than with sheep or cows."

Goats would have provided clothing, meat, and milk as well as bone, sinew, and dung for consumption and trade, the study team says.

Once these pioneer farmers decided to settle, Taberlet adds, they likely took sheep and cows from the surrounding area.

### **Quick Passage**

Peter Bogucki, an expert on Europe's early farming societies at Princeton University in New Jersey, says the work is an excellent example of how recent advances in the study of genetic material from animal bones can shed light on prehistoric human activity.

He said the new findings suggest that goats "moved very quickly from one end of the Mediterranean to the other," rather than a longer-term passage "from one coastal community to another over many goat generations."

Bogucki adds that early Neolithic peoples from the Mediterranean region "were quite adept at coastal movement by watercraft and at crossing straits, even venturing across open sea."

Archaeologist Marek Zvelebil, from the University of Sheffield in England, cautions that the research is based on only a small sample of bones from a single site.

"This site is, however, strategically located along one of those major routes for the dispersal of farming into Europe," Zvelebil said.

He says the study backs other archaeological evidence that indicates that once Neolithic culture reached modern-day Italy, it spread rapidly through the western Mediterranean region.

"The goat was perhaps the first domestic animal, going back to about 11,000 to 12,000 years ago to the Zagros Mountains in northwest Iran," the archeologist added.

Yet, he says, the study does not necessarily provide evidence of large-scale migration from east to west by Neolithic colonizers.

"It may have been the case of local people coming into contact with farmers," he added.

The goat, Zvelebil said, "is an obvious thing for hunting-gathering people to adopt, not only because it would have provided meat on the hoof, but also because it would have acted as a social status symbol."
